TASKS and CHALLENGES

The task was to create a design and website for a SaaS platform from scratch to meet the needs of a new SaaS product. The client needed a clean website that highlighted all the strengths and points of their solution. They needed to educate potential clients on their platform and product features while enticing them to sign up for a free trial account.

SOLUTIONS and OUTCOME

We created a custom, responsive design, with custom graphic designs and illustrations for Sniply that exemplified their brand and core value proposition and implemented it using Full-stack WordPress development. We used the Tailwind CSS framework to provide the great looking custom style for Sniply. As a result, the client got an informative smart website that provides customers with insight on the benefits of link shortening.

Add Your Call-To-Action to Any Page

Sniply works on the same principles as a URL shortener; the difference is that Sniply doesn't just shorten links, it allows you to overlay your own content on the destination site.

Now you can send your followers to third party content without disengaging them. Just embed a button that links back to your own site, or curate an entire education journey that guides them through each step.

Each custom short link you share with Sniply is another opportunity to hook your audience.

Share Shortened Links and Drive Conversions

Whether you need more purchases, signups, or contacts, Sniply can streamline your social media channels so your followers take action.

By curating content from third parties, you can publish much more frequently – using short links to share interesting pages from around the web, customized with a message that prompts users to complete an activity.

Monitor Engagements and Track Results

Monitor Engagements and Track Results

Sniply isn't just an easy way to make short links, it monitors how your audience engages with the links you share.

You can use data about how many people clicked, bounced or converted to optimize your social media marketing campaigns.

Use the link management dashboard to track analytics for each custom URL you share, carry out A/B tests to reveal the best strategies to reach your goals, and measure the overall effectiveness and return on investment for your social media efforts.
