Edit Suits Co. is a London- and Singapore-based fashion company that is on the mission to make made-to-measure menswear worldwide conveniently accessible.

TASKS and CHALLENGES

The client needed to substitute their previous developer with a reliable web design and development firm like MediaMagic as they were not satisfied with the previous team. Edit Suits needed new functionality on their website, new designs for additional pages, and we provided the Wordpress expertise to develop and implement them.

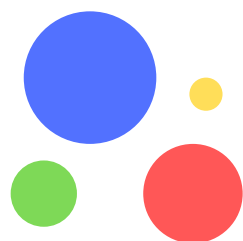

SOLUTIONS and OUTCOME

New functionalities were added to the website, we have also created several tools for customisation of the goods and customers info. Web development, and QA were done using AGILE methods to deliver code and pages to the client in rapid time and according to their priorities. We completed the project on time and delivered the assets in scope.
